Our solution transmits real-time actionable data from tanks and tankers to the cloud, while providing managers and owners of filling station/fuel logistics companies' unhindered access to valuable information on the asset.

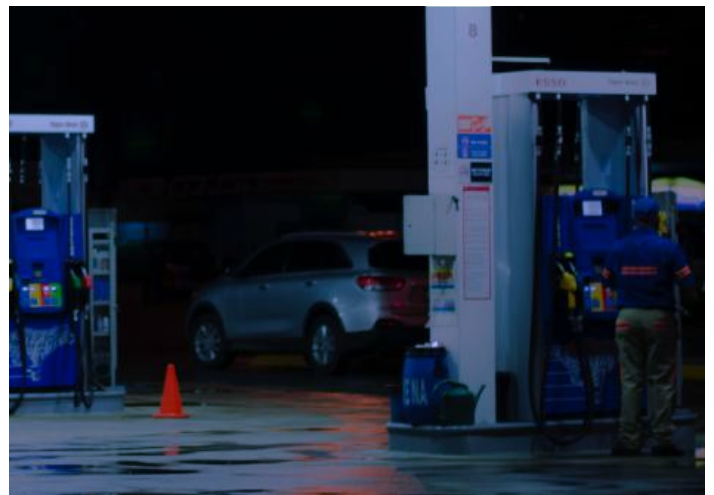

OVERVIEW

Helping oil and gas sectors in Africa realise their potential through innovative software & hardware solutions.

Uptima is on a mission to help businesses in the oil and gas sector in Africa realize their full potential through innovative software and hardware solutions. We are presently a leading provider of hardware and on-demand cloud computing solutions for remote monitoring of tanks and tankers in the oil and gas industry.

U-Track is an on-demand cloud computing solution for remote monitoring of tanks and tankers within the oil and gas industry.

Our solution transmits real-time actionable data from tanks and tankers to the cloud while providing managers and owners of filling station/fuel logistics companies' unhindered access to valuable information on the asset. The resulting information provided helps our clients to better understand asset consumption patterns and notice irregularities among other things thereby mitigating possible losses and improving profitability.

“There is a way to do it better, find it”

– *Thomas Edison*

U – TRACK

Take charge of your fuel level and save.

U-Track is a robust, telemetry solution for remote monitoring of fuel station tanks and haulage tankers via the internet.

The system is easily installed on all types of tanks at a petrol station and tankers, which then automatically records and transmits data to a receiving station via the cloud for analysis.

U-Track is cloud-based hence clients data can easily be accessed via the internet, remotely providing our customers with faster communication within the company's hierarchical system, increased transparency and better operational efficiencies.

Our solution transmits real-time actionable data from tanks and tankers to the cloud, while providing managers and owners of filling station/fuel logistics companies' unhindered access to valuable information on the asset.

HOW WE HELP

Through detailed information and sufficient data, we want to make it easy for you to manage your fuel levels and make informed decisions on your fuel consumption rates.

REAL-TIME OPERATIONAL INSIGHT

You are provided a hawk-eyed view of operations from anywhere they are, thereby easily spotting red flags and preventing possible cash losses.

EASILY ACCESSIBLE DATA

Via your personalized dashboards, various departments can easily see the exact fuel inventory at any time, on any day, with just 1 click, thereby improving operational planning.

REDUCTION IN LOGISTICS COST

U-Track helps in reducing your logistics costs by at least 20% by using previous consumption rates to forecast depletion dates, thus making purchase planning easier and eliminate the risk of shortages and fuel scarcity.

DETAILED REPORTS

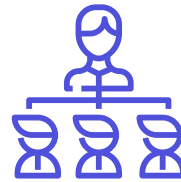

U-Track provides useful insight into historical data with visually appealing charts and graphs, presenting information in an easy-to-read single glance. U-Track also provides automated visibility of expected cash in-flow.

IT IS YOUR COMPANY. WE ARE HERE TO HELP.

PERSONALISED SETTINGS

U-Track allows you to make personalized settings such as different low-level notification for each of your facility, and set price of your product for a better financial report and operational management.

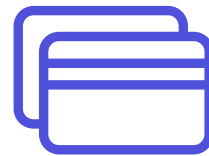

ROLE-BASED USER MANAGEMENT

U-Track allows you to make accessibility setting in the portal. By limiting user access and control as you deem fit, we ensure you stay on top of your data.

24/7 CUSTOMER SUPPORT

Your business is important to us. Our customer service team will always be available to help whenever you need it.

FLEXIBLE PAYMENT PLAN

With our on-demand subscription-based structure, you are offered increased flexibility. You can easily choose a monthly payment plan and this affords you to easily start and stop as the need arises without worrying much about the sunk cost.

BE AHEAD, USE WHAT IT TAKES TO GROW BIG.

Get set in 3 simple steps.

HOW IT WORKS

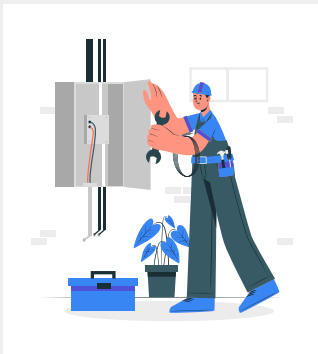

We have made the implementation of the solution
so simple.

How It Works

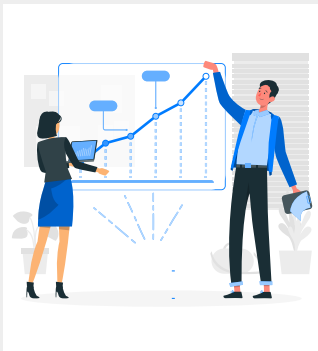

INSPECTION

We inspect the tank or tanker.

INSTALLATION

We install our secured IoT device on the tanks or tankers.

TAKE CHARGE

By accessing the U-Track dashboard from the convenience of your internet-enabled PC or mobile device, you can monitor your assets and view detailed reports when you want.

THANK YOU

We hope to hear from you
